

Who are we?

Metropolitan were incorporated in 1985 serving Tier One building services contractors as their preferred electrical installer. Initially carrying out small projects the company gradually diversified into a specialist Moves & Changes and fit out M&E service provider.

With the support of key clients and the hard work of a dedicated team of long serving employees, Metropolitan have been able to develop this further to become one of the leading Electrical, Mechanical, BMS + controls and Diagnostic Testing contractors in this field.

Each service we provide works to the same exacting standards with an ethos of providing an unparalleled service utilising one dedicated supplier. With a client base including some of the largest blue chip companies in Europe and the USA, our mission is to develop our company in line with existing and new clients demands whilst maintaining the core values all our customers demand.
